

[KOPLAS 2017] COAD show Recovery Type Speed-door

Participated in Korea International Plastics & Rubber Show

COAD presented its Recovery Type Speed-door at 24th Korea International Plastics & Rubber Show (KOPLAS 2017) held at KINTEX No.1 exhibition site in Goyang City from March 7th to 11th.

COAD Speed-doors are completely sealed to prevent dust and insects. In particular, Recovery type is strong against wind pressure and is easy to maintain with automatic restoration function. The lower part is made of flexible material and is safe and can be manufactured in large size. In addition, COAD has the largest product lineup of Speed-Doors including standard model and slim model.

On the other hand, KOPLAS 2017 is an exhibition where you can get the latest materials for plastics / rubber industries from domestic and overseas to environmentally friendly materials to ultra-precision processing equipment. This year, 485 companies from 24 countries participated in with 1,320 booths.
